

## T1 Broadband

*Telecom tools your employees will appreciate.*

### A T1 Product

There is no reason to settle for slow DSL from your current provider when you can experience the speed of a T1 today!

Datavo T1s ensure efficiency and high data streaming for businesses. More often than not, T1 lines offer much faster downstream and upstream speeds than traditional ADSL Service. What makes Datavo's T1 service different from other carriers? Our T1s will cost your business a lot less without sacrificing speed and reliability. In addition, our T1 products include one static subnet or four assignable IP addresses.

A T1 is perfect for a business with 1 to 5 employees in an office setting who need:

- the guaranteed quality of service provided by T1 access networks.
- a maximum uptime solution providing reliable internet access.
- to lower the total cost of telecommunication while enjoying fast, safe and reliable internet access.

Datavo delivers its T1 broadband service over the latest state-of-the-art service components to ensure maximum uptime.
